but what  
about this  
way, too?

# Quick Review

Define passive, aggressive  
and assertive communication.

passive – speaking in a quiet,  
timid voice that does not  
communicate opinions.

aggressive – speaking in a strong  
voice, not caring about other's  
feelings.

assertive – speak up for oneself  
in a way that is honest and  
respectful.

Whatever  
you say.
