QUICK REVIEW

1. Liver This helps store certain vitamins and use a type of sugar your body uses for energy.
2. ~~Stomach~~ In this body part, food mixes with acid breaking it down into a liquid mixture.
3. Mouth Saliva breaks down food into small pieces, which helps food get swallowed.
4. ~~Esophagus~~ A stretchy, long pipe that moves food into your stomach.
5. ~~Small Intestine~~ This absorbs nutrients from the food into the blood stream.
6. ~~Large Intestine~~ All the unused parts of food passes from the body through this.

1. Draw the My Plate and label each food group

2. Color each section

3. Cut out and attach **THREE** different examples of foods for each group.

Name _____

Today, I learned how much of each type of food I should be eating!

Directions:
1. Color each section correctly.
2. Cut out and attach **two** examples of food for each group.
